

# AF 7202

## Medium-Early Brachytic Dwarf

- Harvest 90-95 days after emergence
- Brachytic dwarf genetics provide stout stalks for excellent standability
- Exceptional digestibility from BMR-6
- Great yield for maturity
- Excellent silage choice

AF7202 is a medium season BMR-6 brachytic dwarf forage sorghum. It provides high yield potential with tremendous forage quality of a BMR-6 without the issues of lodging. This hybrid appears to work best in areas south of I-70 where humidity and disease tend to be a challenge. The tillering capabilities of this hybrid are unsurpassed, allowing for increased yields and ground cover. This hybrid is the answer for those in the South looking for a forage sorghum with high-yielding, high-quality, soft dough cutting with the potential for an additional cutting of equal yield and quality.

### Characteristic Ratings

Relative Maturity	Medium-Early
Days to Soft Dough Stage	90-95
Approx. Seeds/Lb (1,000)	17-19
(seed bag for details)	
Midrib Type	BMR-6
Yield for Maturity	2
Forage Quality Potential	1
Palatability	1
Digestibility	1
Seedling Vigor	3
Recovery After Cutting	4
Plant Uniformity	1
Standability	1
Downy Mildew	2
Anthracoese	2
Fusarium Wilt	Not Rated

Rating scale based upon:  
 Poor 10 9 8 7 6 5 4 3 2 1 Excellent  
 Based on Alta Seeds research trials relative to other  
 Alta Seeds products.

**Recommended Seeding Rates:**  
 Vary depending on local growing conditions.
