

# Beefmaster

**Seeding Rate: 35-40lb/A**

**50% Soft Leaf Tall Fescue**

**20% Perennial Ryegrass**

**20% Leafy Orchardgrass**

**10% Alice White Clover**

*Beefmaster is a mixture of forage grasses and white clover, formulated for raising stocker cattle, beef cows and calves. It contains endophyte-free soft-leaf tall fescues with improved palatability and digestibility, which increases intake compared to traditional tall fescues. Orchardgrass varieties in Beefmaster are late-maturing and grazing tolerant. Beefmaster also contains perennial ryegrass known for rapid establishment and exceptional forage quality. Remington, the featured perennial ryegrass, combines the yield and disease resistance of a tetraploid and the density, winter hardiness and persistence of a diploid. Beefmaster also has Alice—a proven, grazing tolerant, large-leaved white clover. The highly productive, high energy forage varieties in Beefmaster provide the nutrients required for rapid weight gains in beef cattle. Beefmaster is ideal for grazing.*

## Key Features:

- Rapid establishment
- Exceptional yields
- Late-maturing: maintains quality
- High dry matter intake: high weight gains
- Persistent
- Alice white clover provides forage protein and soil nitrogen.
