

Sale Topper

Seeding Rate: 15-20lb/A

80% Late maturing Orchardgrass

20% Timothy

An all-grass mix primarily designed to be seeded as a stand-alone crop to be fed to horses, dry cows, heifers or even to milking cows. Also a great complement for new alfalfa and/or clover seedings. Includes 2 premium late heading orchardgrasses, and one early timothy, along with late timothy to throw a few timothy heads over multiple cuttings for hay marketing purposes. Put your legume in the small box and seed this grass mix in the large box.

Soil Adaptation:

Tolerates variable soils conditions

Wet—The timothy component will thrive more in wet conditions.

Drought—Orchardgrass tolerates dry conditions better and will dominate the stand.

pH range: 6.0 and higher

Cutting Management:

Cut leaving a 3 to 4 inch stubble height.

Stand life:

With good management and proper soils, stand should last 3-5 years.

Traffic Tolerance:

Adequate. Both species in the mix have an adequate traffic tolerance.
