

Water Saver® Pro

Turf Type Tall Fescue Blend

This high quality tall fescue blend performs very well for home lawns, commercial landscapes, greenbelts, park and recreation, and low maintenance turf areas. Water Saver Pro contains varieties with medium textured leaves, dark green color, and very good disease resistance. Once established its deep root system proves strong drought resistance and heat tolerance. This blend is well adapted to all areas of tall fescue adaptation and use.

Key Features:

- Ideal in full sun or half-day's shade
- Very deep roots with reduced water requirements
- Lower growing, compact growth
- High traffic tolerance with good recovery
- Very good heat tolerance and disease resistance
- Tolerates the extremes of soil pH and soil types including clay soils
- Blend of top rated turf varieties.

At A Glance

Lawn & Landscapes:

Today's Lawns require turfgrasses needing lower maintenance costs and overall inputs. Lower water use, less fertilizer required, fewer clippings, and aggressively competing with weeds during establishment are all traits that set varieties from Barenbrug USA apart from the competition.
